## World Sorghum Trade Drops to a Near 40-year Low

World sorghum trade is forecast to fall to a near 40-year low this year, largely on reduced U.S. exports (which typically account for 90 percent of global trade). Severe drought in the Southern Plains decimated U.S. production, causing it to fall to the lowest level since 1960. This has severely curtailed exports, with sales down nearly 20 percent year to year. In addition, Australian production was also hurt by drought and exports are forecast to fall by half. Argentine sorghum sales, however, have been very strong as large, lower-priced exportable supplies are creating stronger competition for the United States.

For importers, Mexico is forecast to drop to a 10-year low of 2.3 million as a result of the tight U.S. supplies and a consequent shift to corn for feeding; current purchases are only half of last year. However, EU-25 imports, have jumped as evidenced by import licenses of 500,000 tons (compared to just 5,000 tons this time last year). Sorghum can be imported by the EU with a zero duty because of its relatively high price.

### **Circular Modifications:**

The Foreign Agricultural Service (FAS) will update its production, supply and distribution database for cotton, oilseeds, grains and pulses along with its downloadable data sets at 9 a.m. on the day the World Agricultural Supply and Demand Estimates (WASDE) report is released. It is available on the FAS website (<http://www.fas.usda.gov/psdonline/>). This circular will be released at 9:30 a.m. on the same day. This is an effort to speed up FAS information dissemination to more closely coincide with the release of the WASDE.

## WHEAT: WORLD MARKETS AND TRADE

### MONTHLY HIGHLIGHTS:

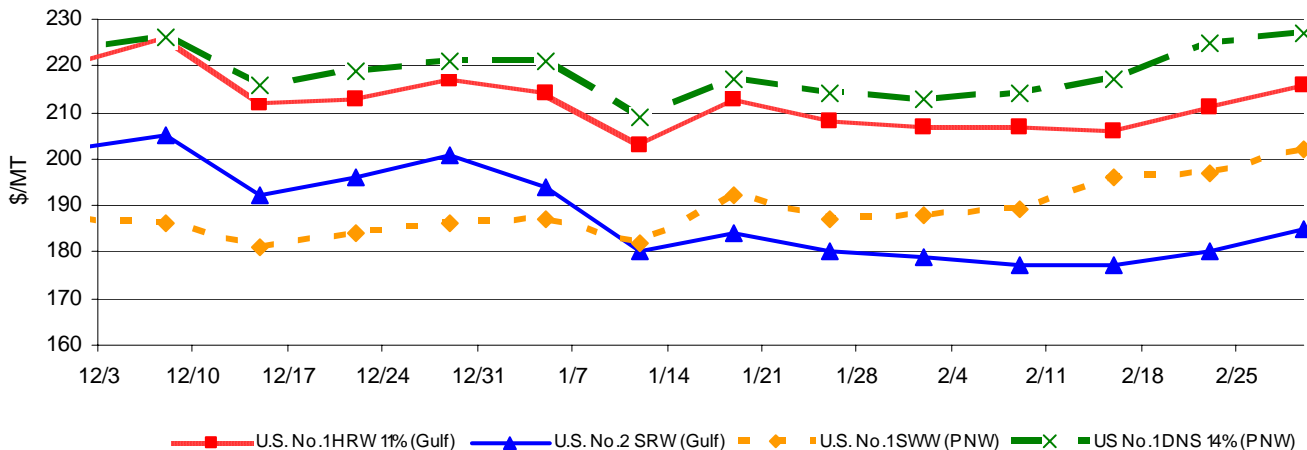

**EU-25 Export Licenses Drag:** EU-25 export licenses have dramatically slowed from the previous year. Total wheat export licenses for flour and grain amounted to 7.7 million tons as of March 1, 2007, while last year they totaled 11.4 million. Because low supplies have caused domestic wheat prices to rise, the Commission in recent months has not approved free market export licenses in order to avoid any further price escalation. In addition, the EU has been selling its wheat intervention stocks in order to keep pressure on domestic prices. However, these stocks are virtually depleted. Flour exports have slowed because many traditional importers have constructed their own flour mills and now buy grain instead of flour.

### PRICES:

**Domestic:** For February, all wheat class prices rose, influenced by stronger export sales and shipments and high corn prices. For the month, Hard Red Winter (HRW) rose \$7 per MT, Hard Red Spring (HRS) rose \$8, Soft Red Winter (SRW) rose \$3, and Soft White (SWW) jumped \$12.

## COARSE GRAINS: WORLD MARKETS AND TRADE

### MONTHLY HIGHLIGHTS:

**Ukrainian Export Restrictions Rescinded:** Ukraine, at the end of February, removed its export restrictions (export licenses and quotas) for feed grains which were imposed in October 2006. At this time, restrictions still exist for milling quality wheat. Ukraine has exported approximately 12 million tons of grain per year the past two years.

The data series for **Bulgaria corn** was adjusted back to 1999/00 based on newly available trade data. (USDA will begin publishing EU-27 data beginning in May 2007.) Recent year changes were relatively minor.

### PRICES:

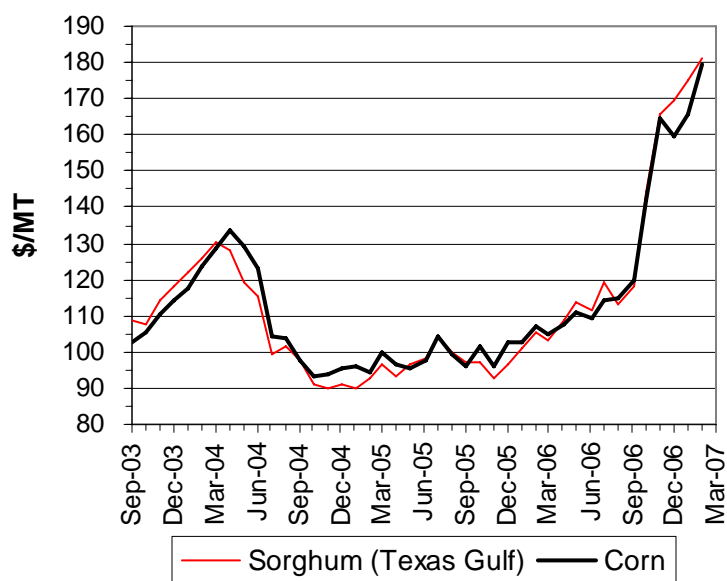

**Domestic:** February export bids for U.S. #2 yellow corn were up \$14 per ton to over \$179, continuing at decade-high levels. Prices were volatile but higher with strong domestic and foreign demand and weather concerns outweighing prospects for record crops in Argentina and Brazil.

### TRADE CHANGES IN 2006/2007

#### Selected Exporters

- **Argentina and Brazil corn** are both raised 500,000 tons to near-record levels because of record production forecasts. Argentina's exports are forecast at 13.5 million tons; Brazil's at 5.5 million.
- **Australia barley** is cut 300,000 tons to 2.0 million, a 15-year low, as drought has sharply reduced export sales and shipments.
- **Canada oats** are raised 100,000 tons to a record 1.8 million on strong shipments and slack Scandinavian sales.
- **EU-25 oats** are lowered 100,000 tons to 150,000 tons, a 10-year low, as tight domestic grain supplies have reduced subsidized oats exports.
- **Ukraine barley** is raised 300,000 tons to 4.3 million as export restrictions have been removed by the government.

## Selected Importers

- **EU-25 corn** is raised 500,000 tons to 4.5 million based on the brisk pace of import licenses. Since January, nearly 1.2 million tons of licenses have been granted.
- **Mexico corn** is raised for the third consecutive month, this time by 500,000 tons, to a record 8.0 million tons. The country has increased its corn import quota in order to boost supplies and reduce domestic prices.
- **South Africa corn** is up 150,000 tons to 850,000 because of reduced prospects for production.

### **OTHER NOTES**

**Stocks:** Unless otherwise stated, stock data are based on an aggregate of differing local marketing years and should not be construed as representing world stock levels at a fixed point in time.

**Consumption:** World totals for consumption reflect total utilization, including food, seed, industrial, feed, and waste; as well as differences in marketing year imports and marketing year exports. Consumption statistics for regions and individual countries, however, reflect food, seed, industrial, feed, and waste only.

**EU Consolidation:** The trade figures for the EU-25 for the years 1999/00 through 2002/03 are inflated by the two-way trade between the two groups (EU-15 and acceding 10). Over the past 6 years, this “intra-trade” has averaged about 700,000 tons for wheat, 350,000 tons each for corn and barley, and 150,000 tons for rye. The trade figures also include intra-trade between members of the acceding 10. From 2003/04 onward, all intra-trade has been removed.

**Statistics:** (1) Wheat trade statistics include wheat, flour, and selected products on a grain equivalent basis. (2) Rice trade statistics include rough, brown, milled, and broken on a milled equivalent basis. (3) Coarse grains statistics include corn, barley, sorghum, oats, rye, millet, and mixed grains but exclude trade in barley malt, millet, and mixed grains.

**Unaccounted:** This term includes grain in transit, reporting discrepancies in some countries, and trade to countries outside the USDA database.
