

Oilseeds: World Markets and Trade

Chinese Demand for Vegetable Oil Fueling Imports as Domestic Sources Stagnate

China is becoming increasingly dependant on foreign sources of oilseeds and vegetable oils to meet growing demand. Production of domestic oilseeds has trended lower in recent years due to limited area available for expansion and marginal yield growth. Meanwhile, vegetable oil demand has grown nearly 25 percent since 2004/05, outpacing domestic sources of oil and leading to higher import volume. Imports of vegetable oils either directly or in oilseed equivalents has grown by over 60 percent since 2004/05 and is forecast to account for two-thirds of total oil consumption in China in 2008/09.

Palm oil imports are forecast to rise almost 9 percent in 2008/09, capturing a larger share of total oil imports. Rapid area expansion in Indonesia and Malaysia has resulted in larger exportable supplies offered at greater discounts to soybean oil. These discounts, along with expected lower rape and sun oil prices, will limit growth in soybean oil imports in the coming year.

Soybean imports are forecast to grow modestly in 2008/09. Tight supplies and high prices will limit import growth as will a rebound in China's soybean production this year.
