Record New Crop U.S. Soybean Sales Reflect Strong Demand

Source: Export Sales Reporting

New crop U.S. soybean plantings will begin soon, but already 7.0 million tons of beans have been sold through the end of March. Forward sales of such volumes are usually not reached until late April or early May. Likewise, sales of soybean meal, processed from the new crop, have totaled a record 1.2 million tons. Forward sales of this magnitude are generally not reached until in late July or August. Whether record forward sales translate to record exports would depend on various factors in the coming months.

This unprecedented pace is indicative of buyers’ interest in securing supplies early in response to current market dynamics in exporting countries. Argentina’s exports of soybeans and meal remain slow (see p2), and Brazil has prioritized loading soybeans over meal in order to mitigate shipping delays.

With a larger crop indicated in USDA’s Prospective Plantings report, the United States is poised to have ample supplies to meet strong foreign demand for both soybeans and meal.

OVERVIEW

Global soybean production is lower with reductions in Brazil and India only partly offset by an increase in Uruguay. Soybean trade is up driven primarily by the United States. U.S. imports are raised reflecting trade to date and prospective large shipments from South America this summer. U.S. exports are boosted on record shipments to date. With stronger exports and tighter stocks, U.S. season average farm prices are raised.

SOYBEAN PRICES

U.S. export bids, FOB Gulf, in March averaged \$561 per ton, up \$21 from last month. Continued strong foreign demand and tightening stocks are contributing to higher prices.

As of the week ending March 27, U.S. soybean commitments (outstanding sales plus accumulated exports) to China totaled 27.8 million tons compared to 21.3 million a year ago. Total commitments to the world are 44.2 million tons, compared to 35.0 million for the same period last year.
